ACADEMICS

CURRICULUM

OHLA uses a skills-based curriculum, focused specifically on developing necessary linguistic skills in five major areas: reading, writing, listening, speaking and grammar. We, at OHLA, know that the best way to develop these skills is to do it in a “natural” way, the same way we all learned our native language. We believe that in order to maintain continuity and be mastered quickly, languages are not meant to be memorized but rather used and practiced on a daily basis.

FACULTY

Every member of our faculty holds a Bachelor’s Degree and additionally has gained their ESL qualifications through postsecondary studies or specialized training courses. Besides looking for individuals with the required educational background, we seek teachers who have international experience and, as such, a number of our faculty members have had previous teaching assignments abroad.

THE DIVERSE EDUCATIONAL BACKGROUNDS OF OUR TEACHERS PROVIDE STUDENTS THE BENEFIT OF VARIOUS TEACHING STYLES AND EXPERIENCES.

OHLA MISSION STATEMENT

“To provide a learning environment that challenges and supports students in achieving their linguistic goals for personal or professional growth, or in gaining entrance into an American University through its Pathway Program.

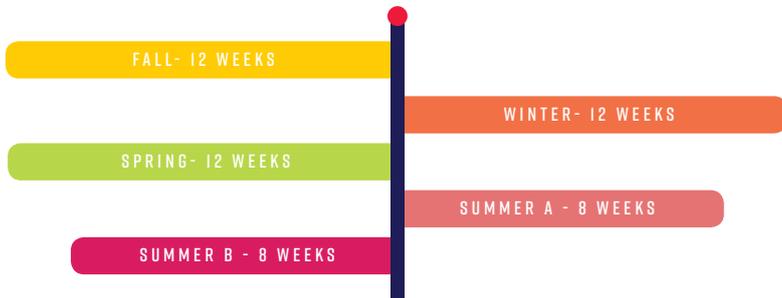

Qualified teachers strive to provide a student-centered environment which enhances academic learning and makes it possible for students to explore linguistic creativity.

Necessary institutional resources are allocated to offer a comprehensive curriculum, outstanding student services, impeccable institutional facilities and innovative technology for learning English as a Second Language.

Knowledgeable and dedicated staff members ensure that, at all times, students are satisfied with their English language studies and are successfully integrated into the community”

SESSIONS

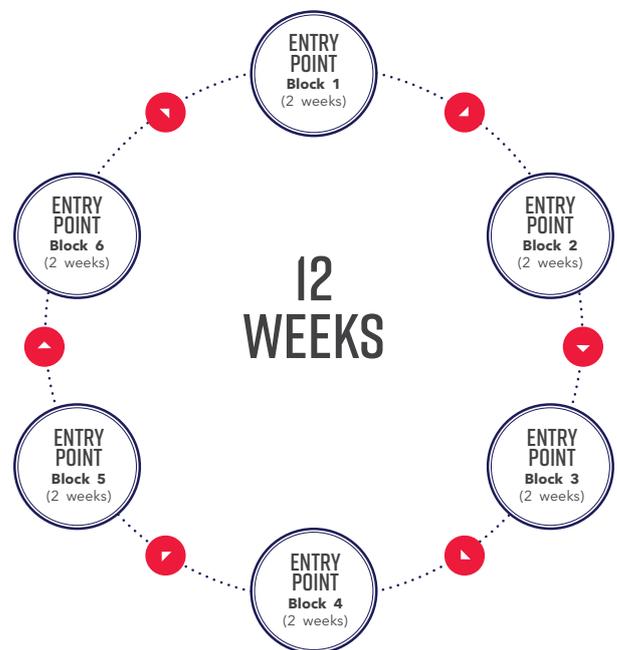

CLASS SIZE

Even though our classrooms can easily accommodate 15 students, our average class size is 12 students.

ENTRY POINT & PLACEMENT TEST

Each level lasts 8 or 12 weeks and is sub-divided in 2-week-units called "blocks". Students may commence their language studies at the beginning of any two-week block. For instance, if a student were to start at the beginning of the third week (beginning of the second block), he or she would complete the remaining blocks for this level, make up the work missed from the first block, and would be promoted to the next level upon achieving a passing score in all the assessment tools (such as the bi-weekly block exams).

While the blocks are designed to be as self-contained and as noncumulative as possible, it is inevitable that the material will build on itself to some degree, resulting in a progression of skill development, which will maximize the students' learning experience.

LEVELS

At OHLA, mastery of the English language is not viewed as a step-by-step approach, but rather as a continuous and progressive process in which international students are challenged as they move through their levels of language study.

New languages are continuously learned and improved upon, the same way in which we are always learning and improving our native language. The main reason for this is that languages are always evolving; just like everything else we see or experience in life.
